TITLE

ABSTRACT

Keywords

1. INTRODUCTION

- 1.1 Background
- 1.2 Problem Statement
- 1.3 Research Gap
- 1.4 Research Objectives
- 1.5 Research Questions
- 1.6 Contributions
- 1.7 Organization of the Paper

2. RELATED WORK

- 2.1 Existing Approaches
- 2.2 Machine Learning Approaches
- 2.3 Deep Learning Approaches
- 2.4 Explainability / Existing Techniques
- 2.5 Critical Comparison
- 2.6 Research Gap

3. PROPOSED METHODOLOGY

- 3.1 Overall Framework
- 3.2 Dataset
- 3.3 Data Preprocessing
- 3.4 Feature Engineering
- 3.5 Feature Selection
- 3.6 Proposed Model

3.7 Baseline Models

3.8 Explainability Method

3.9 Algorithm / Mathematical Formulation

4. EXPERIMENTAL SETUP

4.1 Hardware and Software

4.2 Dataset Split

4.3 Hyperparameter Configuration

4.4 Cross-Validation

4.5 Evaluation Metrics

4.6 Statistical Testing

5. RESULTS

5.1 Overall Performance

5.2 Model Comparison

5.3 Confusion Matrix

5.4 ROC/PR Analysis

5.5 Feature Importance

5.6 Explainability Results

5.7 Ablation Study

5.8 Statistical Results

6. DISCUSSION

6.1 Interpretation of Findings

6.2 Comparison With Previous Studies

6.3 Theoretical Implications

6.4 Practical Implications

6.5 Unexpected Findings

7. LIMITATIONS

8. CONCLUSION AND FUTURE WORK

DECLARATIONS

- Funding
- Conflict of Interest
- Ethics Statement
- Data Availability
- Author Contributions

ACKNOWLEDGEMENTS

REFERENCES

At least 30 references.

A reasonable target for many journals might be roughly:

Section	**Approximate space**
Abstract	200–300 words
Introduction	1,000–1,500
Related Work	1,000–1,800
Methodology	1,500–2,500
Experiments	800–1,500
Results	1,000–2,000
Discussion	1,000–1,500
Conclusion	300–500

This is the more important: **Formatting alone will not make a paper a publishable research paper.**

Think of the paper as having six major dimensions:

Area	What reviewers look for
Novelty	What is genuinely new?
Research gap	Is there a meaningful unresolved problem?
Methodology	Is the methodology rigorous and appropriate?
Validation	Are the experiments sufficient and convincing?
Discussion	Are the results interpreted scientifically?
Presentation	Is the manuscript clear, precise and professionally written?
Reproducibility	Can another researcher understand and reproduce your experiment?
